Education

Chulalongkorn University GPA: 3.96

Bachelor of Engineering in Computer Engineering

Aug 2024 – Present

Bangkok, Thailand

Triam Udom Suksa Phatthanakan School GPA: 3.99

Sci-Math Program

May 2018 – Mar 2023

Bangkok, Thailand

Relevant Coursework

- Data Structures
- Algorithms Design
- Computer Architecture
- Operating System
- Database System
- Program Methodology

Technical Skills

Languages: Bash, C++, Java, Python, JavaScript, TypeScript, SQL

Developer Tools: VS Code, Git, Postman, Docker

Infrastructure: Linux, AWS, Grafana, GitHub Actions

Web Frameworks: Spring Boot, Express, Next.js, Hono, Elysia

Database: MySQL, PostgreSQL, MongoDB, Redis, Prisma, Drizzle

Experience

IFCG Public Company Limited (IFCG)

Backend and Infrastructure Developer

May 2026 – Present

Bangkok, Thailand

- Designed scalable backend architecture and infrastructure using microservices for internal company operations, delivering core services such as HR management, timesheets, and PDF autofill.

Thailand Incubator Club (Thinc.) - CuGetRegV2

Backend and Infrastructure Developer

Sep 2025 – Present

Bangkok, Thailand

- Architecting and developing the next-generation platform (V2) to replace cugetreg.com (V1).
- Developing Backend v2 with a target capacity of 40,000 monthly traffic, utilizing Hono, Prisma, PostgreSQL for optimized performance.

Teacher Assistance (TA) of 2110101 Computer Programming

Teacher Assistance of Chulalongkorn University

Aug 2025 – Dec 2025

Bangkok, Thailand

- Guided students through programming assignments during class sessions.
- Provided after-class assistance and answered questions via Discord.

Projects

Senior Backend of FECamp 19th Chula Engineering | *SpringBoot, PostgreSQL, AWS*

Nov 2025 – May 2026

- Designed and implemented a scalable RESTful API for a Learning Management System (LMS) using Spring Boot and PostgreSQL, supporting real-time Q&A interactions for 500 concurrent users.
- Deployed using AWS EC2, S3, Supabase PostgreSQL, and Grafana for monitoring.

Buddy Budder Website for Computer Engineering Student – Backend | *Next.js, Prisma, MongoDB*

Aug 2025

- Developed website where 100 Computer Engineering students can guess budder and receive buddy hints.
- Implemented backend using Next.js, Prisma, and MongoDB, ensuring seamless integration with frontend development.
- Deployed the website via Vercel and maximized the efficiency of the backend code.

Automatic Speech Recognition Khummuang - Prof. Ekapol Chuangsuwanich | *EspNet*

Sep 2025

- Learned ASR concepts by taking a course at Chulalongkorn University and the Speech Recognition and Understanding online course from Carnegie Mellon University (CMU).
- Trained an Automatic Speech Recognition (ASR) model for the Khummuang language using EspnetEz.

Competition

Thailand Insurance Case Competition 2025 – 3rd Runner Up

June 2025 – July 2025

- Designed an AI-driven web solution to enhance insurance customer experience, balancing business feasibility and customer needs.
